

MADALA NEERAJA

madala.neeraja3@gmail.com | +91 9381391624

Career Objective

Motivated Computer Science and Engineering student with knowledge of Python, Java, C, MySQL, Data Structures, and Software Development concepts. Skilled in problem-solving, debugging, and developing software solutions through academic projects. Seeking an opportunity to contribute to software development, testing, and system improvement while enhancing technical expertise in a dynamic organization.

Education

Bachelor of Technology in Computer Science and Engineering

Vignan's Foundation for Science, Technology and Research, Andhra Pradesh
CGPA: 7.5

2022 – Present

Intermediate Education

NRI Junior College, Andhra Pradesh
Grade: 7.5

2020 – 2022

10th Standard

Sri sai vasavi vidhya Nikethan High School, Andhra Pradesh
Grade: 9.5

2019 – 2020

Technical Skills

Programming Languages:	Python, C, Core Java
Web Technologies:	HTML, CSS, JavaScript
Database:	MySQL
Concepts:	Data Structures, oops, Software Engineering, Data Base Management

Academic Projects

Traffic Congestion Prediction and Analysis

Developed a machine learning model to predict and analyze congestion levels using real traffic data. Applied feature engineering and deep learning techniques to classify severity and identify major contributing factors.

Technologies used: Python, Machine Learning, Deep Learning

SMS Fraud Detection System

Built an SMS spam and fraud detection model using machine learning classification algorithms. Focused on text preprocessing, feature extraction, and accuracy optimization to detect fraudulent patterns.

Technologies used: Python, NLP, Machine Learning

Mobile Phone Price Prediction

Designed a predictive model to estimate mobile phone prices based on specifications and market features. Used data preprocessing, correlation analysis, and regression techniques to improve prediction accuracy.

Technologies used: Python, Machine Learning

Cancer Detection Using Machine Learning

Implemented a supervised learning model to classify cancer cases using medical datasets. Improved diagnostic accuracy through feature selection and evaluation metrics like precision, recall, and F1-score.

Technologies used: Python, Machine Learning (Classification)

Food Delivery Frontend Application

Developed a responsive and user-friendly frontend interface for a food delivery platform. Designed pages for menu browsing, order placement, and user interaction using modern web technologies.

Technologies used: HTML, CSS, JavaScript

Internships

Microsoft Azure — Virtual Intern

Virtual — 3 months

Microsoft Future Ready Talent Program

- Developed and submitted an **SMS Spam Detection** project by implementing text preprocessing, tokenization, and training ML classifiers.
- Gained practical exposure to Azure services and basic deployment workflows.

ServiceNow Virtual Internship Program

Oct 2025

ServiceNow University — SmartBridge — AICTE

- Completed training in ServiceNow platform fundamentals and administration.
- Gained hands-on exposure to workflow automation and introduction to Agentic AI.
- Worked with Flows, Automated Test Framework (ATF), and ServiceNow reporting tools.
- Prepared for the Certified System Administrator (CSA) examination.

Certifications

TCS CodeVita Season 12 — Global Rank 749

2025

Tata Consultancy Services

- Achieved a global rank of **749** out of thousands of participants.
- Recognized for strong problem-solving and competitive coding skills.

AI Azure Virtual Internship

May–Jun 2025

Microsoft — Edunet Foundation — AICTE

- Completed a 4-week internship focused on Azure AI and cloud fundamentals.
- Learned Azure AI services, deployment basics, and cloud project workflows.

Oracle Certified Foundations Associate

Jan 2025

Oracle University

- Certified in Oracle Cloud Infrastructure 2024 — AI Foundations Associate.
- Gained foundational knowledge in AI, OCI concepts, and cloud services.
- Cisco Networking Academy: Python Essentials 1, Introduction to Cyber Security

Achievements

- Coordinator for Vignan Mahotsav conducted by Vignan University
